PATHFINDER®

SIMPLIFYING LIGHTS AND SIREN ACTIVATION

SO SAFETY IS ALWAYS THE FOCUS.

When your officers are in pursuit, every second counts. There's no time for distraction. By reducing the steps in lights and siren activation, the Pathfinder® vehicle response system frees officers to fully focus on the task at hand.

Keep safety at the forefront with the only fully automated system combining lights, siren and Rumbler® control.

EXPANSION MODELS

REAR EXPANSION MODULE

- Provides the ability to flash and blackout OEM brake, tail, turn, and reverse lighting and blackout third brake light
- Eliminates the need for a taillight flasher
- (18) Solid state fully programmable relay outputs, (16 7.5 Amp High 2 20 Amp High)
- (9) blackout relays
- Up to two Expansion Modules can be used with a Pathfinder siren
- Vehicle-specific rear taillight connection wire harnesses available

POWER DISTRIBUTION MODULE

- Eliminates the need for externally mounted fuse holders
- 100 Amp Max load
- (8) Red LED indicator lights to the left of each fuse holder will illuminate if a fuse is blown and it has a load
- (4) Green LED indicator lights above the (4) programmable outputs will illuminate when output is active

24-CHANNEL EXPANSION MODULE

- 24-Channel solid-state relay outputs, 2.5 A Max (active high), 30 A Max total
- Potted to help protect from unfavorable weather making it ideal for under the hood mounting
- All weather-proof connections
- Up to four 24-Channel Expansion Modules can be used with a Pathfinder siren
- Outputs can be dimmed and set as flashing or steady

ON SCENE SYNC MODULE

- Synchronize warning lights and voice messages between multiple "like programmed" vehicles
- Utilizes GPS signal to maintain timing
- Sync unlimited number of vehicles within any distance
- Includes an ambient light sensor to auto adjust warning lights

32-CHANNEL EXPANSION MODULE

- 32-Channel solid-state relay outputs, 2.5 A Max (active high), 40 A Max total
- 3-SPDT, diode-isolated relays allow for brake light blackout and/or brake/taillight flash
- Eliminates the need for a taillight flasher
- Up to four Expansion Modules can be used with a Pathfinder siren
- Potted to help protect from unfavorable weather making it ideal for under the hood mounting
- All weather-proof connections

Pathfinder® PF200 Models

PF200
Self-Contained Controls with
Rotary Knob and Slide Switch

PF200H
Hand-held Controller / Microphone
with 14 Push Buttons

PF2004S
Remote Surface-mount Controller
with 4 Push Buttons

PF200R
Remote Surface-mount Controller
with Rotary Knob and Slide Switch

PF200S17B
Remote Surface-mount Controller
with 17 Push Buttons and Slide Switch

PF200S6
Remote Surface-mount Controller
with 6 Push Buttons and Slide Switch

PF200S4
Remote Surface-mount Controller with
17 Push Buttons, Slide Switch, and
Rotary Knob

PF200S17BRK
Remote Surface-mount Controller
with 17 Push Buttons, Slide Switch,
and Rotary Knob

PF200S13
Remote Surface-mount Controller
with 13 Push Buttons

A WORLD OF CONTROL AT YOUR FINGERTIPS.

**Integrated
Rumbler® capability.**

Get attention and clear
traffic more effectively
than a standard siren tone.

**Integrated
Multi-tone capability.**

Provides a 50% increase in
audible warning distance vs.
single tone siren systems.

**A high-level of
customizable
control capability.**

Easily customize
to your unique
fleet requirements.

**Easy to install.
Fully compatible with your
vehicle's OBD system.**

Save time and expense
with seamless
vehicle integration.

REDUCE TACTICAL STEPS AND IMPROVE OFFICER SAFETY

SEAMLESS OBD INTEGRATION TO KEEP THE FOCUS ON EMERGENCY RESPONSE

Pathfinder® custom programs lights and sirens, giving officers complete control in emergency situations.

CONTROLLER OPTIONS

Pathfinder® PF400 Models

PF400QS17B/PF400S17B
Remote Surface-mount Controller with 17 Push Buttons and Slide Switch

PF400QH/PF400H
Handheld Controller/Microphone with 14 Push-buttons

PF400QR/PF400R
Remote Surface-mount Controller with Rotary Knob and Slide Switch

PF400Q
Remote Surface-mount Controller with 4 Push Buttons and Rotary Knob

PF400QS13
Remote Surface-mount Controller with 13 Push Buttons

PF400QS17BRK/PF400S17BRK
Remote Surface-mount Controller with 17 Push Buttons, Slide Switch, and Rotary Knob

PF400QS21/PF400S21
Remote Surface-mount Controller with 21 Push Buttons and Slide Switch

Risk Reduction: Siren Power & Warning Distance

Seconds count on every response. The faster surrounding drivers can detect, recognize, and respond to your siren, the safer the outcome for you and the community you protect.

Watch how a 400-watt siren can add seconds of reaction time to turn a close call into a controlled response.

HIGH BEAMS: ACTIVATION

Changing warning lights to flood lights is as easy as activating the vehicle's high beams—keeping officer's eyes on the scene.

ILLUMINATION

Flood lights quickly illuminate the emergency scene for officer safety.

BRAKE ACTIVATION

Officer applies the brake to activate additional brake light modules, while maintaining warning light flash patterns.

HORN ACTIVATION

Demand attention through traffic—simply tap the horn to increase speed of light flash patterns and change siren tones.

SITUATIONAL AWARENESS

PERIMETER BREACH WARNING BEHIND THE SCENES PROTECTION

For patrol officers who remain in the field to create incident and end-of-shift reports, Perimeter Breach Warning enhances officer safety by increasing situational awareness around their vehicle.

Perimeter Breach Warning, PBW-SYSTEM, provides a minimum 25-foot activation zone for audible and visual alerts, enhancing situational awareness.

See it in Action

CLOSED DOOR: FULL WARNING

When officer is in the vehicle with the doors closed, the warning lights are fully activated.

OPEN DOOR: END CAP SHUTOFF

When officer opens the vehicle's driver or passenger door, Pathfinder® automatically deactivates alley lights for an unobstructed view and activates running board lights to illuminate officer's path.

CONVERGENCE NETWORK CONFIGURATION SOFTWARE

CUSTOMIZE YOUR LIGHT AND SIREN CONTROLS

Federal Signal's Convergence Network Configuration Software makes it easy to customize Pathfinder to the specific needs of your fleet—and access the controller's many custom features and benefits. Simply connect a USB to a computer and download the functions of the programmed software to the siren.

Programs can be extracted, modified and stored for ease of service and re-use—giving users the ability to clone an entire fleet.

FS Convergence Network Technology

Plug-and-play installation: 2 serial ports for FS Convergence Network products.

Programmable Timer Feature

Senses ignition status and battery voltage to automatically deactivate lighting and other devices—reducing vehicle battery drain.

A Library of Siren Tones

Variety of attention-getting SmartSiren®, Unitrol®, PA300 and Powercall siren tones
Additional siren tones available.

Voice Message

Select from standard pre-recorded messages or optional custom voice messages to broadcast alerts.
Custom voice messages available for an additional fee.

EASY TO INSTALL

BUILT-IN FEATURES THAT WORK WITH YOUR VEHICLES OBD SYSTEM

Integration: A simple plug-in connection. Using a dedicated vehicle cable, Pathfinder® works with the existing vehicle CAN bus system to seamlessly integrate with the vehicle allowing light and siren control with vehicle events. Using the FS vehicle integration also eliminates the need to separately wire features such as horn ring transfer or ignition, significantly reducing installation time and cost.

CLEARING THE PATH

RUMBLER® AND MULTI-TONE CAPABILITY FOR MAXIMUM RESPONSE TO CLEAR YOUR PATH

When responding to a call, safety is the number one priority. Pathfinder® comes through with built-in Rumbler® traffic clearing capability and Multi-tone integration to clear traffic where you need it most.

RUMBLER.

2X LOUDER WHERE IT MATTERS

Rumbler® low frequencies deliver up to 10dB more sound pressure inside civilian vehicles near your emergency vehicle—getting attention and clearing traffic more effectively than a standard siren tone.

Sound pressure varies based on vehicle type and distance.

Low frequency tones work simultaneously with primary siren—penetrating nearby vehicles.

Particularly effective for Police and Fire/EMS applications in dense urban environments with heavy vehicle traffic.

Pathfinder® AMP

MULTI-TONE

Provides a 50% increase in audible warning distance vs. a single-speaker/single-tone system. Multi-tone creates the perception of a multi-vehicle, emergency response ideal for highway patrol.
