

FEDERAL SIGNAL

DATA CENTER

Federal Signal provides visual and audible signaling solutions intended to support safer, more responsive data-center operations. Its signaling equipment can help personnel quickly recognize equipment status changes, alarms, and operating conditions through distinct lights, flash patterns, and audible tones. PLC-compatible controls allow the signals to integrate with automated monitoring and control systems. Flexible mounting, voltage, and modular configuration options allow products to be adapted to different areas and infrastructure requirements within a facility. Durable enclosure ratings and configurable alert settings help Federal Signal equipment serve both routine status indication and critical-event notification needs in demanding data-center environments.

RATINGS AND CERTIFICATIONS

Our products have been designed to meet or exceed the uncompromising standards of UL, cUL, ATEX, ULC, CSA, NFPA, CE, InMetro, UL Fire, and more. Federal Signal products routinely prove themselves, performing reliably in even the toughest operating environments.

VISUAL SIGNALS

Critical warning lights for multiple applications and extreme environments. Our products include flashing, steady state indicators, and rotating lights. Visual signals can be used for process control, plant safety, or fire alarm and emergency evacuation.

AUDIBLE SIGNALS

Industrial audible alarms for fire alarm, fire and gas detection systems and other essential and diverse applications. Federal Signal's offering includes sirens, sounders, speakers, horns, bells, and much more.

PUBLIC ADDRESS

High performance standalone solutions or facility wide public address systems. High-powered audio amplifiers, tone generators, pre-recorded voice messaging and high-quality speakers accommodate any office, industrial, or hazardous location.

INTERCOMS

Two-way modular communication with custom system design and easy expansion. Available in wall-mount, safe area, and hazardous location.

TELEPHONY

Industrial telecommunication devices, IP and analog, suitable for safe area, watertight, and hazardous environments, including flameproof models.

INITIATING DEVICES

Highly visible push buttons, break glass, and pull stations designed to minimize installation expense, discourage tampering, and withstand hazardous environments.

Reach out to us today to learn how we can assist with your project's success.

Our expert teams are fully equipped to design and configure our products to meet the unique needs of your project, ensuring its successful execution from concept to ongoing maintenance.
