

POWERING SMARTER VEHICLE OPERATIONS

Turn Vehicle Activity into Operational Advantage

Drive smarter, more connected fleet operations with a unified solution powered by **Federal Signal® Pathfinder®** and **Panasonic Connect® Tough Command™**

Gain a real-time, end-to-end view of vehicle activity, emergency equipment, devices, and overall operational performance.

Together, **Pathfinder®** and **Tough Command™** help departments move beyond basic vehicle tracking to gain clearer insight into how vehicles are being used, which equipment is active, and where operational attention is needed.

PATHFINDER and FSUNITE

Pathfinder seamlessly manages lights, sirens, public address systems, warning devices, and vehicle inputs. When paired with FSUnite™, it also supports data integration and streamlined information management.

TOUGH COMMAND

Tough Command combines Pathfinder status information with TOUGHBOOK®, vehicle, equipment, and fleet data to deliver actionable dashboards, alerts, reports, and optional automation tools.

Panasonic CONNECT

Real-Time Vehicle Visibility

Understand vehicle status, location, and activity in real time

Equipment & Warning System Awareness

Monitor warning equipment and connected assets alongside vehicle activity

TOUGHBOOK-enabled Field Insight

Bring vehicle and field information together on a durable mobile device

Faster, Better-Informed Decisions

Customizable alerts and dashboards

Improved Readiness & Accountability

Support maintenance, awareness, and operations

**Safety in
this moment.**

That's Federal Signal Strength.
